COMPANY PROFILE

STRATEGIC SOLUTIONS IN AGGREGATES AND LOGISTICS

PARISH AGGREGATES

ABOUT US

WHO WE ARE

Parish Aggregates is a Louisiana-based partner delivering dependable aggregate supply and logistics solutions across the Gulf Coast.
We specialize in high-volume material movement, preconstruction site services, and barge-to-site delivery coordination.
We don't just drop materials — we deliver readiness, execution, and logistical control.

WHY CHOOSE US?

WHAT WE DO?

We support industrial and commercial construction projects by managing the flow of bulk materials — limestone, sand, fill, specialty aggregates — from source to site.
Our team works hand-in-hand with clients, EPCs, and contractors to meet demanding quantities, timelines, and delivery constraints

END-TO-END EXECUTION

OUR STRENGTH

Our strength lies in coordinated execution. With multiple yards, direct river access, and a fleet of transport partners, we simplify complex logistics. From material staging and laydown yard prep to jobsite delivery and coordination, we bring stability and control to every load.

VISION

To be the trusted partner of choice in the industrial sector, shaping the future of construction through strategic foresight and innovation.

MISSION

To support clients with tailored logistics, pre construction solutions integrating material supply expertise while ensuring safety, efficiency, and long-term success.

MAIN SERVICES

PRECONSTRUCTION SERVICES

Planning and site coordination to reduce risk, cut costs, and prepare for smooth execution.

AGGREGATE MATERIAL SUPPLY

Limestone, sand, fill, and specialty materials delivered with a logistics-first approach.

ONSITE CONCRETE BATCH PLANTS

Directly on-site or nearby for faster pours, reduced haul time, and improved project flow.

LOGISTICS & TRANSPORTATION

Shuttle service, bus operations, and parking logistics for safe, efficient workforce movement.

PRECONSTRUCTION SERVICES

Strategic Planning That Sets Projects Up for Execution

Need Preconstruction Support?

Let's get involved early to map out your site, refine material scope, and build a plan that supports smooth execution from day one.

At Parish Aggregates, preconstruction is where strong execution begins.
We partner early with project teams to plan material flow, site logistics, and delivery sequencing—so when construction starts, everything is aligned.
We don't just advise – we prepare your site for real-world conditions, volumes, and timelines

Feasibility & Budgeting Support

We evaluate material needs, site constraints, and access early to support realistic planning, accurate quantities, and confident execution decisions.

Site Access & Logistics Planning

From laydown areas to haul routes, staging zones, and traffic flow, we design logistics plans that support safe, efficient material movement.

Risk & Cost Control

We align sourcing, delivery timing, and on-site handling so materials arrive when needed—without congestion, delays, or rehandling..

Industrial Partner Collaboration

We work alongside owners, EPCs, and contractors as an extension of the team—connecting logistics, materials, and site execution into one plan.

Prepared Sites. Aligned Execution.

Our early-stage coordination ensures materials, logistics, and site readiness are aligned before mobilization—reducing surprises once work begins.

Key Success Drivers:

- Early Site & Logistics Alignment
- Material Scope & Flow Planning
- Coordinated Hauling & Staging
- Execution-Ready Site Preparation

When we plan with you early, we build better together.

AGGREGATE MATERIAL SUPPLY

Strategic Sourcing & Delivery for Industrial Projects

Parish Aggregates specializes in delivering high-volume rock, sand, limestone, and specialty fill materials for construction projects across the Gulf Coast.
We go beyond supply—coordinating the logistics that keep your site stocked, on time, and on budget.

Custom Sourcing Solutions

We source directly from producers and landowners to secure materials that meet your specific specs, gradation needs, and timeline..

Logistics-Driven Delivery

From barge or rail to truck, we manage end-to-end movement with an emphasis on site coordination and downtime reduction.

Bulk Handling Expertise

Our access to laydown yards, staging zones, and offloading equipment ensures safety, speed, and scale—even on high-volume projects.

Reliable Supplier Network

Our partnerships with producers, quarries, and transporters ensure dependable delivery even under shifting schedules or market shortages

Need Materials Delivered On Time and On Spec?

We help you build a material flow plan that keeps your site moving — with bulk supply, logistics, and sourcing tailored to your project needs.

Reliable Delivery. Predictable Results.

Our logistics-first approach keeps material flow aligned with your schedule — minimizing downtime, change orders, and site delays.

Key Success Drivers:

- Coordinated Hauling & Staging
- Permit & Compliance Support
- Multi-Source Material Flexibility
- Onsite & Near-Site Delivery Options

We don't just move material — we move projects forward.

ONSITE CONCRETE BATCH PLANTS

Controlled Production.
Reliable Execution.

Parish Aggregates provides onsite and near-site concrete batch plant solutions designed to support high-volume pours, tight schedules, and complex site logistics.
By producing concrete closer to the work, we help projects maintain consistency, coordination, and control from start to finish.

Strategic Site Placement

We set up batch plants on-site or on nearby leased land, reducing haul distance and eliminating reliance on off-site facilities.

Schedule-Driven Production

Onsite batching reduces downtime between loads, supports continuous pours, and allows teams to adapt quickly to changing field conditions.

Consistent Mix Quality

With direct control over batching and sequencing, we help maintain mix integrity, reduce waste, and support quality standards across every pour.

Integrated Site Coordination

Our team aligns plant operations with site logistics, traffic flow, staging areas, and workforce movement to keep operations running smoothly.

Considering an Onsite Batch Plant?

We help teams reduce pour delays, improve quality control, and align concrete production with real jobsite demands.

Concrete Where and When You Need It.

Onsite batch plants provide production control, logistical efficiency, and consistency—supporting demanding schedules and complex jobsite conditions.

Key Success Drivers:

- Faster Setup & Mobilization
- On-Site Production Efficiency
- Mix Quality & Process Control
- Reduced Hauling & Site Congestion

Because timing, quality, and control shouldn't be optional
